FiberGrip® SMA

The 905 SMA FiberGrip® Connector is a simple to use, epoxyless, interconnect solution for markets where High-Power Delivery is required.

This two-piece connector is designed as a safe and cost effective alternative that allows for efficient ease of use during termination.

Amphenol's 905 SMA FiberGrip® Connector is designed for high power applications.

The connector ferrule is made from stainless steel allowing the ferrule to act as a heat sink, pulling the heat quickly from the fiber, when used.

Damage threshold on these types of connectors will vary based on launch conditions and operational wavelength. The front body of the connector is a stainless steel ferrule that is designed with a custom, high-tolerance, application specific hole diameter. The rear body contains the proprietary fiber retention system designed to carefully secure the optical fiber, without the risk of damage, to the connector.

Features and Benefits

Quick and Safe Epoxyless Termination

Designed for use with High Power Medical Laser Delivery Systems

Can withstand Autoclave and ETO Sterilization process

Custom Optical Fiber Hole Sizes and Ferrule Tip configurations

Strain relief boots and dust caps available with medical grade material

Compatible with RFID Integrated Technology

Specifications

Tolerance for Stainless Steel Ferrule Holes: 125um to 149um: +5/-0um

Tolerance for Stainless Steel Ferrule Holes: 150um to 249um: +10/-0um

Tolerance for Stainless Steel Ferrule Holes: 250um to 1499um: +15/-0um

Tolerance for Stainless Steel Ferrule Holes: 1500um to 2300um: +25/-0um

Retention value is dependent upon the specific size and type of the optical fiber

Retention can reach values of 20 lb. and higher - Amphenol will determine retention values
